

## Arctic Snowplows Warranty

ARCTIC Snowplows are guaranteed to be free from defects in material or workmanship under normal use and service for 3 (three) years after the date of purchase (hydraulic power system, hoses, hydraulic cylinders, controllers, wiring harnesses, lights, blade frame, blade moldboard, A-frame, quadrant, lift frame and vehicle undercarriage) and an additional 4 years on the structure only (blade frames, A-frame, quadrant, lift frame, vehicle undercarriage and weldments).

Arctic Equipment Manufacturing Corporation will replace or repair, at its election, without charge, any part which becomes defective within the period of time described.

Warranty does not apply to paint deterioration, expendable parts, such as pins, springs, cutting edges, bushings, shoes, blade guides, seal beams, light bulbs, nuts and bolts or tightening nuts and bolts which are considered normal maintenance.

Warranty for installation errors and omissions shall be the responsibility of the selling dealer and Arctic Equipment Manufacturing Corporation will not be responsible for any damage caused by improper installation by others or for any damage caused by abuse, misuse, negligence, accidents, failure to maintain proper fluid/lubrication levels, or operation of the plow without shoes.

In no event shall Arctic Equipment Manufacturing Corporation be liable for claims for loss of use or consequential damages.

This warranty is made only to the original purchaser. There is no other warranty expressed, implied, or statutory.

Arctic Equipment Manufacturing Corporation reserves the right to change specification without prior notice.

## Customer Responsibility

The loaded vehicle, including all after market accessories, the snowplow, passengers and cargo, **MUST NOT** exceed the gross vehicle weight ratings (GAWR), front gross axel weight rating (FGAWR) or rear gross axle weight rating (RGAWR) specified on the Safety Compliance Certification Label located in the driver's side door opening. It is the operator's responsibility to verify that these rating are not exceeded.

To determine the Gross Axle Weights for your vehicle, including all after market accessories, the snowplow, passengers and cargo, take your loaded vehicle and the snowplow to a scale. With the snowplow attached, place the front wheels of the vehicle on the scale to get the front gross axle weight (FGAW). To get the rear gross axle weight (RGAW), place the back wheels of the vehicle on the scale.

The addition of ballast weight placed rearward of the rear axle may be required to prevent exceeding the FGAWR and provide good vehicle breaking and handling. When ballast is

required it must be secured behind the rear wheels in a manner, which prevents it from sliding during normal driving.

The customer must register their snowplow with Arctic using the available registration card found at the owner's manual **within 60 days from the day of purchase**. This registration card can be mailed, faxed or emailed, or the customer may choose to register using the online registration system found on the Arctic Snowplows website.

In order for the customer to be eligible for warranty every year, the snowplow, inclusive of all components, must be returned to an authorized Arctic dealer every spring for preventative maintenance. Failure to do so will nullify any future warranty claims.

Replacement parts installed by Arctic dealer will be covered 90 days under the warranty or balance of original purchase warranty, if greater than 90 days.

#### Disclaimer notice

Arctic Equipment Manufacturing Corporation (Arctic) does not assume liability for damage to your motor vehicle resulting from the attachment or use of an Arctic snowplow. The purchaser assumes all vehicle risk associated with the attachment and operation of this snowplow.

The Arctic snowplow you purchase must be used only on vehicles equipped with the manufacturer's snow plow preparation packages. Snow plowing without the original plow preparation package may damage your vehicle. The added weight may impair the operation and control of your vehicle. Snow plowing with a vehicle not recommended for that purpose by the manufacturer may void your new vehicle warranty. If your vehicle is not equipped with an original snow plow preparation package, additional equipment may be necessary before snow plowing. Please consult your vehicle and snowplow dealers prior to the purchase and installation of the snowplow. The installation of such parts however is not a full substitute for the original equipment snowplow preparation package.
