

LONG LIVE THE GALVANIZED PLOW!

If there's such a thing as the perfect snowplow, this could be it. The hot dipped galvanizing process makes our already tough plows even tougher. It gets into hollow spots that are prone to corrosion, and the extra layer of protection means the plows are virtually maintenance-free. Our galvanized snowplows provide the best performance in winter's worst conditions because the zinc coating provides superior resistance to abrasion and water.

Available on all models.

UNIFORM CLEAN METALLIC APPEARANCE

looks good and reduces the need for re-touching or painting

SUPERIOR RESISTANCE TO ABRASION, WATER AND RUST

makes it ideal for snow removal machinery

TOTAL PROTECTION

covers even tough-to-reach areas missed by other coating processes

LOW LONG-TERM COST

extreme durability means your investment has a longer service life

LOW MAINTENANCE

the galvanic coating will not shrink or crack, and self-heals on scratches up to 1/8"

COATING BONDS TO METAL OF THE PLOW

which makes it stronger than uncoated steel

LIMITS RUST AND CORROSION

that can damage the snowplow and lead to wear and grinding on pivot pins

NO PAINT TO PEEL
which means no scraping or sandblasting

NOW AVAILABLE ON ALL OF OUR POLY AND STEEL PLOWS

Visit our website for full details and to learn about our industry-leading 7-year warranty
